Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 6,233,986 to Suzuki et al.

Suzuki discloses an electrically operated steering lock device comprising a lock bolt (14) which is movable between a protrusion position where a steering shaft (9) is locked and a retreat position where the steering shaft is unlocked, and a cam member (34) which rotated by an electric motor (18) to actuate the lock bolt, as well as a rotation blocking means (43) which is electrically driven and which, when the lock bolt is placed at the retreat position, engages with a first engagement portion (33a) formed the cam member block rotation of the cam member; and holding means (33b) for holding the rotation blocking means state that rotation of the cam member is blocked, as in claim 1.

Suzuki also discloses that the cam member acts to move the lock bolt to the protrusion position when the electric motor is rotated forward (column 7, lines 49-59), and to move the lock bolt to the retreat position when the electric motor is rotated reverse (column 8, lines 45-49), as in claim 2, as well as the holding means is a second engagement portion (33b) formed in the cam member, and in a state that engagement with the second engagement portion has been released by reverse rotation of the electric motor, the lock bolt is protrudable by forward rotation of the

electric motor (column 8, lines 50-61), as in claim 3, wherein a cam portion (23) of the cam member is formed in such a manner that the lock bolt is not actuated at a time of release operation that the engagement with the second engagement portion is released by reverse rotation of the electric motor (column 8, line 62-column 9, line 2), as in claim 4, further comprising lock bolt holding means (45) for holding the lock bolt at the retreat position while the lock bolt is placed at the retreat position, as in claim 5.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to electrically actuated steering column locks:

U.S. Patent Number 6,543,262 to Limburg et al., U.S. Patent Number 6,234,039 to Garnault et al., U.S. Patent Number 6,053,067 to Garnault et al., U.S. Patent Number 4,984,481 to Jawdoszyn, U.S. Patent Number 3,673,829 to Mizuno, U.S. Patent Number 3,400,563 to Lempke et al., U.S. Patent Number 2,616,274 to Landrum.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Boswell whose telephone number is (703) 305-4067.

The examiner can normally be reached on 8:30 - 5:00 M-F.
